Constantinos Craig

IT Operations Engineer

Lubbock, TX • constantinoscraig@gmail.com • linkedin.com/in/constantinoscraig • craigsec.github.io

SUMMARY

IT operations and systems administration professional focused on keeping business-critical infrastructure running and secure, covering Active Directory, Microsoft 365, Entra ID and Intune, endpoint and user support, and the networks and hardware behind them. I came into IT by building and running real systems hands-on, and now work across enterprise and maritime environments with a strong focus on defensive security.

CORE SKILLS

Systems & Administration: Active Directory, Microsoft 365 / Exchange Online, Entra ID, Intune, Identity & Access Management, Group Policy, Windows Server, Linux / Ubuntu Server, user provisioning

Infrastructure & Networking: MikroTik RouterOS, Ubiquiti UniFi (UDM-Pro, IPS/IDS), Cisco managed switches, VLAN design & bridge filtering, subnetting & routing, workstation & server-room deployment, cabling

Security & Access Control: Microsoft Defender (Attack Simulation, TVM), Splunk (SIEM), phishing analysis, Conditional Access, access-control systems, Hikvision / CCTV, security awareness

IT Operations & Support: Technical troubleshooting, endpoint & remote support, escalation management, IT ticketing systems, SOP documentation

Virtualization & Automation: Proxmox VE (clustering, quorum), Synology NAS, PowerShell, Python, SQL, Bash scripting

Maritime / Specialized Infrastructure: Satellite connectivity (OneWeb/Eutelsat LEO, Inmarsat Fleet Xpress + FleetBroadband), Starlink / 5G backup, SAILOR VSAT, MarPoint Governor, NAVTOR NavTracker / NavBox, SNMP device monitoring, CyberPower ATS / PowerWalker UPS

PROFESSIONAL EXPERIENCE

ICT Operations Engineer • Laskaridis Maritime

Kifissia, Athens, Greece | 2026 – Present

- Operate and secure vessel network infrastructure across the fleet: MikroTik switching and VLANs, comms racks, and onboard IT services.
- Manage multi-link WAN connectivity across OneWeb LEO, Inmarsat Fleet Xpress + FleetBroadband, Starlink, and 5G backup.
- Administer Microsoft 365, Entra ID, and Intune; design Conditional Access for offline and shared vessel terminals.
- Commission vessel comms racks (MikroTik, VSAT, Synology NAS, UPS) and monitor devices via SNMP.

IT Generalist / IT Support Technician • IntouchCX

Athens, Greece | 2025 – 2026

- Provided day-to-day IT support for end users across office and remote environments, covering hardware, software, and connectivity issues.
- Supported Microsoft 365 (Teams, Outlook, SharePoint, OneDrive) and handled user account administration: password resets, access requests, and basic Active Directory tasks.
- Set up and troubleshot Windows endpoints in a managed environment, plus macOS support with Jamf / JDM exposure (device setup, configuration profiles, application issues).
- Diagnosed network issues including VPN connectivity, DNS resolution, and LAN/WAN, and ran onboarding and offboarding with correct access and device provisioning.
- Escalated complex infrastructure and security issues to senior IT; maintained incident, procedure, and asset documentation.

Team Lead • Walmart

Lubbock, Texas | 2022 – 2024

- Led and supervised a team in a high-volume retail store, keeping day-to-day operations efficient and customer service consistent.

- Coached, trained, and onboarded associates with hands-on feedback and clear expectations.
- Managed daily operations, delegated responsibilities, and adjusted staffing to meet business demands and performance targets.
- Tracked productivity and key metrics, put plans in place to improve efficiency, and handled conflict resolution and customer escalations.

General Manager • Le Thai LLC
Las Vegas, Nevada | 2011 – 2020

- Managed all daily operations of a top-performing downtown Las Vegas restaurant, leading up to 45 employees across two locations after the business expanded.
- Built and retained a strong team, with many staying 7+ years, owning hiring, onboarding, scheduling, training, and performance management.
- Managed financial performance, labor costs, inventory control, and vendor relationships.
- Planned and executed large-scale private events and full restaurant buyouts for major corporate and high-profile clients.

PROJECTS

Car Rental IT & Surveillance Build
Lubbock, Texas | 2024

- Designed and built the on-site IT for a Turo car-rental operation: secure remote access, surveillance, and storage.
- Stood up a VPN tunnel for remote management and camera viewing with nothing exposed to the internet, over dynamic DNS on a residential IP.
- Ran Hikvision IP cameras to an NVR virtualized on Proxmox, isolated on a dedicated VLAN with no internet route.
- Used a Synology NAS for footage and files with scheduled snapshots and backups, UPS-protected for clean shutdown.

CERTIFICATIONS

- CompTIA Security+ (2024)
- ISC2 Certified in Cybersecurity, CC (2024–2027)
- Google Cybersecurity Certificate (2024)
- Google IT Support Certificate (2024)
- In progress: Hack The Box CJCA, working toward CDSA (defensive-analyst path)
